The nursing home facility improvements effort received a \$1,000,000 appropriation in FY 2008 and \$600,000 in FY 2009 from the RIIF. During the 2010 Legislative Session, SF 2366 (FY 2010 Appropriations Adjustment Act) deappropriated \$1,400,000 from those appropriations because the DHS had received federal funds for the improvements. The DHS also received appropriations from the RIIF in the following amounts:

- FY 2016: \$728,818
- FY 2015: \$500,000
- FY 2014: \$150,000
- FY 2013: \$250,000
- FY 2012: \$285,000

Projects funded with the appropriations include replacing nursing wings, adding skilled nursing facility specialty wings, facility demolition and replacement, and other related improvements. The projects also receive federal funding in addition to the state funds.

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the DNR for the Water Trails and Low Head Dam Public Hazard Program. This appropriation notwithstanding the definition of vertical infrastructure.

DETAIL: The funds are used to support grant awards to local entities for water trail enhancements and dam mitigation grants to dam owners, including State and local government entities and private owners, to improve low head dam safety. state-designated water trails are designed to provide four basic types, or levels, of recreational experiences: Gateway, Recreational, Challenge, and Wilderness. Each segment of a water trail is assigned one of these experience ratings that reflect a range of conditions available to the user in the designated waterways.

While there are different types of low head dams, they generally consist of a riverwide dam that is normally overtopped by the entire river's flow. Flood gates may or may not be present to reduce upstream flooding effects. The height of these dams is less than 30 feet. Low head dams were originally constructed throughout the state to power gristmills and sawmills. They were later used for hydroelectric generation. Low head dams can be extremely dangerous due to the powerful recirculating hydraulics that are generated. Prior year appropriations for the Water Trails and Low Head Dam Public Hazard Program include:

- FY 2016: \$1,750,000 from the RIIF
- FY 2015: \$2,000,000 from the RIIF

The DNR received appropriations totaling \$25,000,000 for infrastructure improvements at state parks. The funding consisted of four appropriations of \$5,000,000 beginning in FY 2011 through FY 2016. The state park infrastructure appropriations are an effort to improve the parks in preparation for the 100th anniversary of state parks in 2020.

 7 29 technology, and the university of northern Iowa to reimburse
 7 30 the institutions for deficiencies in the operating funds
 7 31 resulting from the pledging of tuition, student fees and
 7 32 charges, and institutional income to finance the cost of
 7 33 providing academic and administrative buildings and facilities
 7 34 and utility services at the institutions:
 7 35 FY 2016-2017:
 8 1 \$ 32,447,187

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the Board of Regents for the tuition replacement appropriation that pays debt service on academic revenue bonds.

DETAIL: This appropriation will be used to replace student tuition and fees required to pay the debt service on academic revenue bonds authorized in prior fiscal years. Iowa Code chapter 262A, enacted in the 1969 Legislative Session, authorizes the sale of academic revenue bonds by the Board of Regents.

The first academic revenue bonds were issued in 1970 and provided the primary source of funds for construction of academic facilities at the universities for several decades. The academic revenue bonds are secured by student tuition and fees and are considered independent and not part of state obligations. The appropriation is not mandatory by statute, but the Board of Regents has previously indicated that without a tuition replacement appropriation, an aggregate increase of 5.00% in tuition across the universities will be required to pay the debt service. Therefore, the General Assembly provides the appropriation to keep tuition costs lower for students. The tuition replacement appropriation provides most of the annual debt service on the academic revenue bonds, but a portion of the debt service is paid from reserve fund interest.

Funding for tuition replacement has been provided for many decades. Until FY 2002, the appropriation was made solely from the General Fund. After FY 2002, a portion was funded from the General Fund and from infrastructure-related funds such as the RIIF and the Restricted Capital Fund. From FY 2006 to FY 2008, funding for this appropriation was divided between the General Fund and the RIIF. Since FY 2009, the entire appropriation has been funded from the RIIF.

8 15	\$	3,400,000

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the Department of Transportation (DOT) for the Recreational Trails Program.

DETAIL: The Iowa trail system consists of approximately 1,500 miles, including multi-use trails and off-road paths. A local match of 25.00% is required in accordance with the DOT administrative rules. Trails that receive funding must be maintained for public use for a minimum of 20 years. Applications for funding from the trails program are considered twice per year and are approved by the Transportation Commission. Prior appropriations include:

- FY 2016: \$3,400,000 from the RIIF
- FY 2015: \$6,000,000 from the RIIF

Transit agencies are eligible to apply for the grants that are approved through the Transportation Commission and the projects must meet the definition of vertical infrastructure. The state match requirement is up to 80.00%. Funds are used for capital projects such as new bus storage buildings, administrative buildings, maintenance facilities, storage buildings, reconstruction of steam cleaning areas, vehicle storage and wash bays, as well as replacing roofs or other improvements.

 8 26 \$ 2,000,000

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the DOT for the Railroad Revolving Loan and Grant Program.

DETAIL: While funding for the Railroad Revolving Loan and Grant Program has fluctuated, the Program has typically received between \$1,500,000 to \$4,000,000 annually. The funds are used to provide grants and loans for construction and improvements to railroad facilities, such as railroad main lines, branch lines, switching yards, sidings, rail connections, intermodal yards, and highway grade separations. The Railroad Revolving Loan and Grant Program is targeted toward job growth and economic development, so many of the grants have gone to construct spur lines that service ethanol and biodiesel plants. The Program has three eligible funding categories that include job creation, rail network improvement, and rail port planning and development. Industries, railroads, local governments, or economic development agencies are eligible to apply for grants and loans from the Program.

 Department has received an annual appropriation of \$600,000 from the
 Technology Reinvestment Fund (TRF) since FY 2008 for the
 warehouse.

The funds support the statewide education data warehouse that is
 used in conjunction with system-wide improvements for education
 resources and accessibility of the resources. The data warehouse,
 known as EdInsight, is intended to create a combined education
 information system for teachers, parents, administrators, area
 education agency (AEA) staff, policymakers, and other staff. The
 purpose is to facilitate the flow of student transcript data between Iowa
 high schools and postsecondary institutions nationally, and to facilitate
 flow of student records among Iowa school districts. EdInsight is
 designed to provide tools to evaluate individual student and group
 performance over time. In addition, funds are used for the e-Transcript

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the
 Department of Education to pay the costs of maintenance and leases

10 5 FY 2016-2017:
 10 6 \$ 2,727,000

associated with Part III fiber connections for the Iowa Communications Network (ICN).

DETAIL: The Department has received an annual appropriation of \$2,727,000 from the TRF since FY 2007 for the costs of maintenance and leases. The fiber optic cable for Part III sites is leased from the private sector vendors that installed the cable. The ICN administers leased digital data circuits to approximately 442 K-12 facilities and districts, libraries, and AEAs. According to the ICN, 82.90% of the total usage of video hours by K-12 facilities, AEAs, and libraries was provided through Part III sites. These leases and maintenance costs are a continuation of the Part III build-out project authorized during the 1995 Legislative Session. The funding is used for the leases and maintenance expenses. State funding draws down federal Universal Service Fund E-rate moneys that pay for the additional cost of leasing the data circuits.

10 7 c. To the public broadcasting division for the replacement
 10 8 of equipment and for tower and facility maintenance:
 10 9 FY 2016-2017:
 10 10 \$ 1,017,000

Rebuild Iowa Infrastructure Fund appropriation to Iowa Public Television (IPTV) for equipment replacement and tower and facility maintenance.

DETAIL: Iowa Public Television received appropriations totaling \$3,216,000 over the past three fiscal years for equipment replacement and for tower and facility maintenance. According to IPTV, with the conversion to digital broadcasting and digital equipment, stations moved from proprietary hardware to commoditized hardware that runs specialized software bundled as systems. The useful life for the commoditized hardware is shorter, typically two to three years and serviceable for up to five or six years. Analog equipment typically has a 10-year useful life and is often serviceable up to 20 years. The equipment was evaluated by IPTV and a plan for replacement was devised based on the commoditized hardware life expectancy. The plan will be reviewed and updated by IPTV each year to ensure replacements are made strategically.

10 11 3. IOWA TELECOMMUNICATIONS AND TECHNOLOGY COMMISSION
 10 12 For replacement of equipment for the Iowa communications

 10 18 operations and maintenance costs of the network.
 10 19 In addition to moneys appropriated in this subsection,
 10 20 the commission may use a financing agreement entered into by
 10 21 the treasurer of state in accordance with section 12.28 for
 10 22 the replacement of equipment for the network. For purposes

DETAIL: The ITTC has received annual appropriations of approximately \$2,000,000 from the TRF since FY 2007 for replacement of equipment for the ICN. Funds are used for upgrading to Internet Protocol (IP) video technology and offering better quality video via an IP option to existing educational users. Permits the Commission to enter into contracts for the replacement of equipment, operations, and maintenance costs.

10 23 of this subsection, the treasurer of state is not subject to
 10 24 the maximum principal limitation contained in section 12.28,

10 28 4. DEPARTMENT OF HUMAN RIGHTS

10 29 a. For the cost of equipment and computer software for the
 10 30 continued development and implementation of Iowa's criminal
 10 31 justice information system:
 10 32 FY 2016-2017:
 10 33 \$ 1,345,000

Rebuild Iowa Infrastructure Fund appropriation for FY 2017 to the Department of Human Rights (DHR) for continued development and implementation of the Criminal Justice Information System (CJIS).

DETAIL: Annual funding for the CJIS project has varied. The project has received between \$1,300,000 and \$2,900,000 per year from the TRF since FY 2007, with the exception of FY 2009 and FY 2010. Funding was not appropriated during these two fiscal years for the project. The CJIS enables and facilitates the automated exchange of criminal justice information among local, state, and federal criminal justice agencies. This initiative is to develop a seamless, real-time, and electronic information sharing system for members of the criminal justice community in Iowa. Current collaboration with other criminal justice systems includes the County Attorney ProLaw Case Management and Judicial Dialog Case Management systems, Traffic and Criminal Software (TraCs) system, Iowa Corrections Offender Network (ICON), Iowa Online Warrants and Articles, Iowa Court Information System (ICIS), and others. Funds are used for operation of the system, further development, information technology and network hosting, and software needed for the system.

The CJIS has a number of exchanges that are 100.00% implemented, meaning that the CJIS centralized computer system is fully programmed to receive and transmit information to be exchanged and that all possible state, local, and in some cases, federal agencies are actively sharing information through the CJIS system for that exchange. These exchanges include: the adult data warehouse; the juvenile data warehouse; protective orders; protective orders served; orders for presentence investigations; presentence investigation reports; National Instant Check System (NICS); OWI dispositions; and sex offender address updates.

 20 11 FOR CONTRACTS. Pursuant to section 8D.11, subsection 1,
 20 12 paragraph "a", the general assembly authorizes the Iowa
 20 13 telecommunications and technology commission to enter into a
 20 14 contract or contracts in excess of the contract limitation
 20 15 amount established in section 8D.11, subsection 1, paragraph
 20 16 "c", for purposes of the commission's network core upgrade
 20 17 project. This authorization applies for the duration of the
 20 18 commission's project and to all existing or future contracts
 20 19 associated with the project, whether or not the award is made
 20 20 to a single vendor or multiple vendors.

DETAIL: The Core Network Project is the Commission's long-term strategy to maintain and enhance the Network that began with the implementation of the Broadband Technology Opportunities Program (BTOP) upgrade that was completed in 2013. This project will result in a 100 GB core network established throughout that state and will enable the Iowa Communications Network (ICN) to prepare for the future and continue to operate a state-of-the-art network providing resilient, secure, and reliable services to ICN users. It is anticipated that the project will take 18 to 28 months to complete. Depending on the vendor solution selected, the term of operation of the solution implemented should be from five to 10 years. It is anticipated that the cost of this project will be in excess of \$6,000,000 and this exceeds

the ICN's current contract limitation amount of \$2,294,751. The ITTC has indicated that no appropriated funds will be requested to complete this project.

Prohibits funds appropriated for public vertical infrastructure projects from being used for salaries of restricted employees beginning in FY 2017. The bill defines restricted employee as an employee that has a salary set by the Governor within a range set by the General Assembly or a president of a Board of Regents institution.

Requires that state agency budget requests for FY 2018 specify whether requested funds will be used for state employee salaries and benefits.

Allows the Executive Council to purchase Elim Fellowship Church. This church is located on the State Capitol Complex and is at the corner of East 9th and Des Moines Street.
